Rahmonjon Ibragimov

I am very social and easy to work with, while completing the given task. So far I have JavaScript, HTML, CSS, jQuery, Bootstrap, and Git/GitHub under my belt. Currently I'm improving in learning React, SQL, Node.JS, MongoDB, and Express.JS. I'm still enthusiastically grabbing onto any other programming languages, frameworks, or principles I can integrate into the coding web in my head.

To Whom It May Concern

January 20, 2014

Dear Sir or Madam,

Rahmonjon Ibragimov has studied at the Institute of Applied Linguistics of Riga Technical University for three semesters. I have known him for the last three semesters as an Instructor of the study courses "Computer Science" and "Machine Translation".

During his studies, Rahmonjon has shown himself as a highly-motivated student able to work both independently and to cooperate within a team. He was an active participant in class discussions, and got thorough understanding of complicated theoretical issues without much difficulty.

Rahmonjon is initiative, polite and co-operative. He listens attentively to the opinions and desires of others, but at the same time he is also capable to work independently. He has good writing and verbal communication skills. It should also be mentioned that the student recognizes the importance of strong work ethics, persistence, and intellectual integrity.

I truly believe that Rahmonjon is a deserving candidate that you will be proud to have. If you have any questions regarding his knowledge and skills, please feel free to contact me at (+371) 67089501 or oksana.samuilova@rtu.lv.

Yours faithfully,

Oksana Samuilova
